Abstract (en)

[origin: WO9306025A1] The invention relates to a package for a product comprising at least one elastic damping body (12) arranged around at least a part of the product, filled with medium and having at least two medium chambers (14, 15) which are joined for medium communication via at least one constriction (18), wherein the medium chambers are positioned such that the resultant force via the product only acts on one of the medium chambers, wherein in preference the medium chambers are arranged on mutually adjoining surfaces of the product.
