Abstract (en)
[origin: WO9407103A1] The gun silencer proposed can be adapted for use with a wide range of ammunition types by virtue of the following features: an adapter (2) designed to be attached to the mouth of the barrel; an end-piece (6) forming the mouth of the silencer, with an aperture (42) designed to allow the projectile to pass out; a central element (4), located between the adapter (2) and the end-piece (6), with a number of compartments (24) disposed one behind the other in a straight line, each compartment having an aperture designed to allow the projectile to pass through; each compartment (24) being attached in modular fashion to the next compartment (24) and the outer walls (28) of the series of compartments (24) forming the outer wall of the silencer.
