Abstract (en)

[origin: EP0661014A2] Device for adjusting the height and/or the inclination of a table top (10). Provided between the table top (10) and a supporting frame (12) is a parallelogram linkage (1, 2, 3, 4) which allows both height adjustment and inclination adjustment in both directions by means of an adjusting device (20) as a function of the displacement of articulation points (1, 2). <IMAGE>
