Abstract (en)

[origin: EP0661222A1] The transport packaging (1) is formed from a palette-like base part (5), a covering part (6) and of connecting means for connecting the said parts. According to the invention, the base part and the covering part are designed as profiles which are essentially U-shaped in cross-section and whose edge flanges run in the same direction, a transporting recess (12) for internal conveying vehicles being provided in the edge flange of the base part. <IMAGE>
