Abstract (en)

[origin: US5485785A] PCT No. PCT/DE93/00905 Sec. 371 Date Mar. 23, 1995 Sec. 102(e) Date Mar. 23, 1995 PCT Filed Mar. 23, 1995 PCT Pub. No. WO94/07695 PCT Pub. Date Apr. 14, 1994. An apparatus and a process are used to maintain a set contact pressure per defined width of a roller mark of an ink application roller against a printing cylinder. The ink application roller is supported by a lever that has one portion biased against an adjustable stop. A temperature compensating element is provided between the lever and the stop to maintain the set contact pressure over a range of temperatures of the ink application roller.
