Abstract (en)
The invention relates to a stacking block (1) intended to be placed between stacked-together concrete elements and the like, whereby the stacking block (1) is made of an elastomeric material and is provided with projecting cams (3,4) at its bottom side and at its upper side, in such a manner that several blocks may be placed on top of each other, whereby the cams (4) located at the bottom side of a block (1) engage in the spaces between the cams (3) provided at the upper side of a lower block (1). <IMAGE>
