Abstract (en)

[origin: EP0662441A1] The present invention relates to a method for sucking off and automatically removing the fly and dust in a bobbin winding station during the whole operating time of the bobbin-winding, for withdrawing and accumulating the fly and dust in the suction pipe of the guide slot of the thread-end wound onto the bobbin, and for removing said accumulation at the end of each winding. The present invention also relates to the equipment for the embodiment of the above method. <IMAGE>
