Abstract (en)
[origin: EP0662568A1] A closure (6) is provided for the cylinder tube (2), which with at least one section extends into the cylinder tube and is held by fixtures on the cylinder tube. The closure is formed as a closure plug, which is inserted in the cylinder tube. It has at least one cross-bore (20), which coincides with a cross-bore in the cylinder tube crossways to the longitudinal direction (10). The fixtures extend crossways to the longitudinal direction of the cylinder tube and in the at least one cross-bore of the closure plug. They also engage through the corresp. cross-bore of the cylinder tube. The cross-bore of the closure plug is a through passage bore.
