Abstract (en)

The procedure uses a double-hooked support (2,4) on the mast, designed to receive a bar (5) connected by ties (6) to a rod (3) passing through the upper edge of the banner (1). The bar is placed in the support with the aid of a pole (10) which has a semi-cylindrical cradle (11) on its upper end for the bar. In a variant the banner can have a second bar connected to its bottom rod and made to engage with a second double-hooked support facing in the opposite direction. In another variant the banner's upper rod can be connected to a single central ring which is placed over a hook on the mast by a pole with a hook on its upper end.

Abstract (fr)

Procédé de fixation d'une banderole sur un mât à équiper tous les mâts à l'aide d'une potence (2) spéciale, à prévoir à la partie supérieure de la banderole un organe d'accrochage (5) susceptible de coopérer avec ladite potence et à utiliser une perche (10) comportant à son extrémité supérieure un organe de support (11) susceptible de coopérer avec ledit organe d'accrochage (5). <IMAGE>
