Abstract (en)
[origin: WO9408095A1] A device for securing property against undesired removal/displacement including a first unit (1, 30) adapted for countersinking with respect to the ground or surface (GS, 39) at the location required whereby the plane of the uppermost surface of the first unit (1, 30) is positioned below or flush with the adjacent ground of surface (GS, 39) and a second unit (8, 32) adapted for connection to said first unit (1, 30) in such manner that when so connected with the first unit (1, 30) the property to be secured against undesired removal/displacement is so secured.
