Abstract (en)
[origin: EP0663170A1] The support (6) consists of a folded cut-out section joined to the top (2) and bottom (3) tray. The support has opposite facing movable flaps (7) attached at one end to one of the two trays with the other end free. The support has opposite facing guide flaps (12) one end of which is attached to the other of the two trays, and the other end joined to the movable flap. The support has opposite facing stabiliser flaps (13) one end of which is movable attached to the one trays and the other end to the other tray. Between the two ends is a bend line (17). The free ends of the movable flaps have protruding catches (10) fitting into slots (11) in the guide flaps.
