Abstract (en)
Roof tile (1) of synthetic material, comprising a top plate (2) and a bottom plate (3), which are spaced at a distance from each other for defining therebetween a hollow space closed in lateral directions, with a lower opening (30), which is arranged in the lower head edge (6) of the tile, for the passage of air to and from the hollow space and the discharge of moisture from the hollow space, and with an upper opening (31), which is at least in part arranged in the bottom plate (3), for the passage of air to and from the hollow space from and to the spaces located below the roof tile in the situation in which the roof tile is used, respectively, wherein the bottom plate (3) is shaped such that an expansion tray (19) is formed in the hollow space for air entering through the lower opening (30). <IMAGE>
