Abstract (en)

[origin: EP0663491A1] The insulation holder has a baseplate (1) for its fixture to a scaffolding beam, which has several division points successively arranged in the longitudinal direction. At one end of the baseplate is a first holder plate (2a) enclosing a right angle, which on the outside has at least one spike (3). At the opposite end of the baseplate to the first holder plate is a second holder plate (2b) likewise enclosing a right angle with the baseplate and on the outside has at least one spike. The holder plates extend over the baseplate only on one side. The fixture of the holder plates to the baseplate is reinforced by at least one angle (7).
