Abstract (en)
A strike plate assembly, intended for building in a door or window frame, wherein the strike plate is provided with an opening for the spring bolt of a lock which is accommodated in a door leaf or window leaf, wherein the opening for the spring bolt is bounded on the leaf side by stop means for the spring bolt, which stop means are attached to the strike plate with the help of releasable securing means, wherein the assembly is further provided with continuously operating adjusting means, such as an eccentric cam for adjusting the position of the stop means with regard to the strike plate in the swinging direction of the leaf. <IMAGE>
