Abstract (en)

A device for simplifying the positioning of heating elements (11), such as halogen lamps (11B), electrical resistance elements (11A) and the like associated with corresponding reflecting and containing elements (11C) in a glass ceramic cooking hob (1) comprises a spacing member (15) arranged to cooperate with said reflecting and containing element (11C) and comprising portions (25) for cooperating with corresponding seats (26) provided in predefined positions within the cooking hob, any heating element (11) being able to be positioned at a distance from the edges of the cooking hob (1) by connecting said spacing member (15) to the corresponding seats (26). <IMAGE>
