Abstract (en)

The present invention relates to inhibiting dye transfer compositions comprising polyphosphine P-oxide polymers which contain units having the following structure formula : <CHEM> wherein Q is a polymerisable unit, whereto the P-O group can be attached to or wherein the P-O group forms part of the polymerisable unit or a combination of both. A is <CHEM> -O-, -S-, <CHEM> x is O or 1; R are aliphatic, ethoxylated aliphatics, aromatic, heterocyclic or alicyclic groups or any combination thereof whereto the phosphor of the P-O group can be attached or wherein the phosphor of the P-O group form part of these groups.
