Abstract (en)
[origin: EP0664583A1] A small electric light bulb (10) is mounted into a holder (7) that fits into an aperture formed in a circuit board (PCB) (1). The PCB has a hole formed with an essentially circular cross- section and with two oppositely positioned slots that allow locking arms to be inserted. The main body (9) of the holder has a pair of arms (13) with tip sections (15) that latch into position. Contact arms (12) engage tracks on the PCB.
