Abstract (en)

This furniture item has the characteristic of being formed by superposing modules each consisting of a shelf formed as a perimetral consolidated structural element of the furniture item, each structural module being structurally completed by the base of the overlying module, the top module being structurally completed by a specific panel. The furniture item has a preferably square base to enable the modules to be superposed mutually turned through 90 DEG or through an angle which is a multiple of 90 DEG C. The modules of the furniture item form open or closed compartments. Such closure is preferable effected by a shutter. Said modules form slide guides for drawers. <IMAGE>
