Abstract (en)

[origin: FR2697513A1] An assembly for a rotary conveyor for any bulk material. Said assembly (S) is provided with devices (3 and 2) for radially supporting and driving a rotary conveyor (T) at one or more points on its radial periphery, as well as devices (8) for positioning it relative to a supporting plane and, if required, moving it. The assembly combined with the rotary conveyor forms a discrete module.
