Abstract (en)  
[origin: WO9409214A1] Polder principle comprising upright shielding walls (9) which are located opposite one another and are inserted into the ground relatively wide apart and which are connected to one another at the bottom in an essentially water-impermeable manner (10), the walls located opposite one another delimiting an essentially V-shaped funnel-shaped region narrowed towards the bottom, and a method for implementing said polder principle.
