Abstract (en)

[origin: WO9406975A1] A prefabricated pipeline cassette, intended to be mounted against a wall (42) in a bathroom or other similar room, comprises a body (10), usable as a support structure for a wall-mounted water-closet bowl (34). In order to avoid disadvantages of previously known such cassettes, the body (10) is arranged to be mounted in a position lifted up from the floor (38) of said room by being mounted suspending from the ceiling (21) of said room by at least one anchoring means (22) anchored to said ceiling and by being subsequently secured in a position in close contact against said wall (42) by securing means (26) fixed to said wall.
