Abstract (en)
[origin: EP0666037A1] The ski boot consists of an upper (1) which envelops the foot, and a leg section (3) which is pivoted to the upper and is made from front and rear components (5,6) attached to a common pivot (4). The leg section also has closure and locking elements, with a tensioner (10) mounted on one side of the rear element of the leg section, connected to a cable (11) which passes round the top portion of the leg section and is covered by a strap (16). The rear element of the boot's leg section has guides (20) for the cable and the strap, while the front element has a guide (18) for both the cable and strap adjacent to the cable's fixing point (15).
