Abstract (en)
[origin: EP0666133A1] Consoles (5) are grooved over their complete length, facing in the direction of advance. Each rail (9) of the rail arrangement projects over the head side of the webs (11), and extends along the complete stop length. A plug-shaped locking pin (15) passes through a console and one or all rails, when in locking position. The pin is located at a distance to the end of the associated console. Each rail engages on the base of the associated groove (12,a). Each console has an open edge groove on one side, and a web on the opposite side.
