Abstract (en)  
[origin: EP0666372A1] A cobblestone, of a rectangular concrete brick, is made of coarse concrete composed of one-third chip and similar material, with a grain size of less than 8/16. The curvature of the rounded corners (16) is of differing radii, and of an irregular counter curvature to the adjacent butting surfaces (12). An irregular corrugated counter curve structure exists between butting surfaces (12) on the same side. The upper edge has irregular curvatures, larger than 5 mm, broken out.
