Abstract (en)  
A damp proof course (DPC) system is provided which comprises an elongate rear member (12) associated with an inner leaf (22) of a cavity wall. The member (12) includes a skirt (13) which cooperates with a damp proof course membrane (24) or a cavity tray in order to span the cavity. The skirt (13) has a longitudinal hinge (15), in the form of a line of reduced thickness, which allows it to be raised away from the rear member (12).
