Abstract (en)

The invention relates to a junction pole, for use in a demountable panelling system, that can serve as a junction between panelling walls defining a four way junction, a T-junction, or a corner. The junction pole includes a lower pole section (10), an upper pole section (12) and one or more pole covers (14), the pole sections (10,12) being securable to the upright side members (26) of framework sections, forming part of panelling walls, at their point of juncture and the pole covers (14) being adapted to cover the exposed sides of the pole sections (10,12) in their operative configuration.
