Abstract (en)
[origin: EP0666392A1] A U-shaped basic part (1) is provided, on the arms (12) of which locates a cover part (2). Common guide surfaces are available for the drive rods and at least one cylindrical bearing hole (15) for the gearwheel together with at least one opening for the drive component engaging on the drive pylon. Connecting hooks (23) are formed on the cover part, engaging in a recess (13) in one arm (12) of the basic part. The hooks are angularly formed with a projecting extending in the housing longitudinal direction. The projection engages in a groove of the recess (13) of the arm. The axial extent of the recesses (13) is greater than the axial extent of the hooks provided with the projection.
