Abstract (en)  
[origin: EP0667110A1] In the outer walling (2) of the profile (1), extending in the extrusion direction, are back-cut grooves (3). The grooves in the area of the outer walling are outwardly closed by separable wall strips (5) of the profile. The outer walling of the profile along the edges (13) of the wall strips are weakened formations acting as theoretical sepn. points. The outer surface of the wall strips locates firmly on the outer surface of the adjoining outer walling of the profile. The wall strips are set back in relation to the outer surface of the outer walling. The profile is of light metal, esp. aluminium alloy, plastics or of a material which permits the sepn. of the wall strips.
