Abstract (en)
[origin: EP0667300A1] The present invention relates to a dosing cap (20), which is a measuring cup adapted to serve as a liquid tight closure. Said dosing cap is lightweighted, in the sense that it presents a wall with two different thicknesses. The thinner walled part (26) is inserted into the neck (12) of the container (10) to achieve the necessary closure. The thicker walled rest (28) of said dosing cap remains outside and serves as a gripping means to open the corresponding container. <IMAGE>
