Abstract (en)
[origin: EP0667428A2] Each support section is formed as an adjustable steel foot (2), and a number of such feet support a bearer plate (3), on which the plaster layer (4) is located. The bearer plate is formed as a sheathing component and the plaster layer is applied by pouring. The plaster type can also be formed from dry plaster plates. An acoustic insulator (6) is arranged between the steel foot and the basic floor.
