Abstract (en)

[origin: EP0667598A2] The recording device for transport vehicles includes a box (10) inside which there is system for recording the hourly times at which the vehicle is driven. This is linked to a printer cooperating with a paper disc which turns within the box. The box itself is made of fireproof material and has an independent electrical supply. A central module (15) includes provision to guide and advance the card or paper on which the information is recorded. Three additional modules (12,13,14) measure the working times of different drivers. Information recorded includes loading and unloading times, rest and working times, along with the month and date and details of the distance covered.
