Abstract (en)
[origin: EP0667703A2] An image forming apparatus and method is provided with the following: a rewritable RAM which outputs as an output image data a data at an address corresponding to an input image data; a ROM in which a data to be written in the RAM is stored; a data processing CPU capable of processing and changing the data to be written in the RAM before it is written; and a RAM. The ROM also stores a parameter data representative of the characteristic of the data stored therein. The CPU and the RAM process the data to be written in the RAM with reference to the parameter data. <IMAGE>
