Abstract (en)
[origin: WO9411112A1] Described is a multifunction shower head with a housing (1), a rigidly mounted perforated plate (4) and a rotatably mounted spray-adjustment plate (8) in which is fitted a mesh-screen disc (7) and to which is rigidly connected an adjustment ring (6). Between the housing (1) and the perforated plate (4) is a baffle plate (2) with apertures (21) to allow the water to pass through and a travelling wheel (3) with radial plates (31) disposed in a ring, through-flow areas (32) and blanked-off areas (33). Turning the spray-adjustment plate (8) with respect to the perforated plate (4) and locking or releasing the travelling wheel (3) enables several different types of spray to be selected.
