Abstract (en)
[origin: WO9411270A1] A flexible dispenser/container comprises a flexible pouch (1) formed of flexible plastics material and having an aperture (2) in one face of the pouch for dispensing objects therefrom; a flap (3) of flexible material secured at one end to the said face of the pouch for releasably sealing the aperture in that face by means of the action of the releasable adhesive (4) between the flap and the outer surface of the pouch; a further sheet (6) of flexible plastics material being attached to the undersurface of the said face to underlie the whole area of the aperture in that face, the further sheet being provided with an aperture corresponding to the aperture in the major face of the pouch but of such dimensions that an inner rim (7) of the said further sheet material extends inwardly of the margins of the aperture in the said face.
