Abstract (en)

[origin: WO9411678A1] The invention relates to an arrangement in connection with an air conditioning unit, comprising at least one fan (4) fitted within a casing structure, means for conveying untreated outdoor and indoor air into the casing structure, and distributor means (9) for distributing air into the interior space of the building to be air conditioned. To improve the overall economy of the air conditioning unit, the arrangement is constructed as a wall-mounted unit and the distributor means (9, 19) for distributing air into the interior space are integrated in the same unit with the other components of the arrangement.
