Abstract (en)
[origin: EP0668028A1] The casing has a transport unit container (3) with several retention cells (13) for the cigarette etc. boxes (2). Each cell pref. forms an air-tight storage chamber for the cigarettes etc. with the side-open cigarette box. The cells are formed by the container partitions (12). The container is enclosed by a top wall (4), a rear wall (8), and two side walls (7), with a front-open insert side (11) and an open bottom side (9). The latter may be fitted with insert strips (14). Each cell opposite partition is typically fitted with a transverse aligning strip, protruding into the cell.
