Abstract (en)

[origin: EP0668039A1] The support has two parallel pairs of identical arms (2.1) which hold the bars and are joined together by a central region (2.3). The arms are joined to a bar (1), and the main axis of the central region is orthogonal to the axis of the bar (1.2). A triangular piece (1.3) at the top of the bar holds the support on a rod. Each arm has a stop (2.2) at its free end, with the stops on the upper and lower bars being opposite each other. The upper surface of the lower arms has ribs (2.4).
