Abstract (en)
[origin: EP0668090A1] The ski binding is in two parts and has a base part (3) and which has holders (8,7) for the boot, and two different fastening parts (10,12) which can be adapted to the relevant use. The fastening parts can each be fixed on the touring ski or a snowboard and detachably connected to the base part (3). The length of the base part allows it to be mounted on the snowboard without projecting over the sides. The fastening part (10,12) which is mounted on the touring ski comprises an extension member (10) swivel mounted on the bearing part (12) and designed to slide in and fix in an indent (18) formed on the base part.
