Abstract (en)

[origin: EP0668218A1] The container forms a rectangular parallelepiped with lengthwise walls (7,8,10) joined together to form a rigid assembly. The walls of the container are of a honeycomb structure, joined together either directly or by connecting elements (11) of cardboard, corrugated cardboard or honeycomb cardboard. At least one of the container's lengthwise walls is joined to an adjacent one by a corner piece of L-section rigid or honeycomb cardboard which is stuck to the adjoining outer surfaces of the contiguous walls. Other walls (7,8) can be made from a single panel of honeycomb cardboard, folded over to form adjacent walls.
