Abstract (en)

[origin: EP0668420A1] The closure plate has a reversible component part (intermediate wall 8) which is provided so that the side ribs of differing width (6,7) can be arranged on both sides of both bolt entry spaces (9,10). The reversible component part as intermediate wall (8) is fitted between the bolt entry spaces. The intermediate wall has a foot part (12) evolving from the floor of the closure box (1), through which passes a fixture screw (14) and in the area of the closure plate box front side has a gallows-shaped extending lobe (22). The narrow end edges of the front plate at opposite ends have different figurations.
