Abstract (en)
[origin: EP0668427A1] The fitting has a pane or panel (2) which is operable at least around a movement axis has a frame (4) the profiles of which are partic. of metal and/or plastic. The frame has a rabbet surface which is provided with a back-cut profiled guide channel for longitudinally displaceably accommodation of at least one drive rod (8,9). A bracing gear (5) is provided, the housing (6) of which is fixable to the face surface (12) of the frame (4). In the housing (6) is a rotatably located hand grip (7) for operation of an all-round toothed pinion and in the housing are two counter-running, longitudinally displaceable toothed slides meshing with the pinion. On the rear side of each toothed slide extends a driver tongue which extends through a common slit of a cover plate releasable connected to the housing.
