Abstract (en)
[origin: GB2272444A] A non-halogen containing flame-retardant additive comprises a salt of an inorganic phosphorus-containing acid and a polymeric compound which is a homopolymer or copolymer and comprises a linear backbone formed of at least 10 repeat units and contains a plurality of basic nitrogen functionalities. The additives may be incorporated into polymers, e.g. polyolefin polymers, or may be formulated into coating compositions.
