Abstract (en)

[origin: EP0669243A1] Each support (3) carries a pair of guide and support rollers (8,7). The rollers are supported in guide and support elements (6), which are located on the vehicles. Each element is formed by a U-shaped rail, extending in longitudinal vehicle direction. The support roller is turnably held by a fork (9), which is positioned vertically on the rail. The guide roller is turnable about a vertical shaft (11) on a turnable arm (10) on the carrier. The guide roller engages on the web of the U-rail. The support roller rolls off one flank (6a) of the rail.
