Abstract (en)

[origin: EP0669424A2] Two parallel webs (4,5) form the connection between the hollow-cylindrical elements (2,3). The height of the webs corresponds to only a fraction of the height (8) of the elements, pref. between 1:3 and 1:5, e.g. 1:4,5. The webs are integrally formed with the elements, and are relatively stiffened by a cross web (6). Two or more elements form a one-piece rail.
