Abstract (en)
[origin: WO9412752A1] A number of cylinder sector-shaped safe compartments are formed within a cylindrical protective housing (2). Each safe compartment has an access opening which can be closed by means of a door (16). The safe compartment access openings are covered by a rotatable disc (20) or a rotatable cylinder (52) which is provided with an opening (22; 54) which can be brought into line with any safe compartment access opening in order to gain access to the safe compartment in question.
