Abstract (en)
[origin: EP0670127A1] The attachment comprises a holder (3,5) which consists of two interconnected C-shaped clamping jaws (3a,3b;5a,b) which are tensioned against the seat support (2). The clamping jaws are positioned in symmetrical mirror arrangement to each other and each have a contact surface for a counter-holder (4,6). The counter-holder of the seat (1) is in the form of an L-shaped angle piece one arm (9,10) of which rests on the contact surfaces. The ends of the clamping jaws each have a fixture hole for clamping parts, pref. screws.
