Abstract (en)  
[origin: EP0670186A2] A liquid spraying vessel provided with a body proper (1), a cylinder (10) suspended in the vessel with cap-like member (3) fitted over the outer periphery of opening neck of the vessel, and a stem (17) erecting from a cylindrical piston (16) fitted into said cylinder and passing through the top wall (4) of said cap-like member, and a working piece (20) having a head (18) with a nozzle to open toward the front side fitted at the upper end of said stem, so that liquid in the vessel is sucked into the cylinder with the vertical movement of the working piece relative to the cylinder and spouted from the nozzle (19) through the stem, wherein said working piece is easily operated with auxiliary walls (6, 6) to serve as finger-applying parts and head guides are erected on both sides of the head of the working piece. <IMAGE>
