Abstract (en)

[origin: EP0670268A1] There is provided a pallet (1a) adapted for fastening stacks of plates (4), the pallet defining a plurality of holes (11) in appropriate positions peripheral to outer edges of a plurality of different plates to be stacked on said pallet (1a), said holes (11) being suitable for receiving fasteners (3) for selectively fastening a given stack of plates (4). The present invention also relates to methods for storing, transporting, packing and fastening stacks of plates (4); to structures for fastening and storing stacks of plates (4); to carriers (6) doubling as pallets; and to methods for storing pallet-equipped carriers (2) or carriers (6) doubling as pallets after packages carried thereby are unloaded therefrom. The invention is intended for use in applications of transport, e.g. applications involving containers for efficiently accommodating various stacks of a plurality of plates having different plane figures (steel members, plastic plates, etc.). <IMAGE>
