Abstract (en)

[origin: EP0532964A1] The invention relates to a coiler head (1) for sliver-depositing devices, especially of drawing frames and cards, with a three-dimensionally curved sliver channel (2). The sliver channel (2) is formed from a tubular piece with two circle arcs (15, 16) merging directly into one another. The sliver channel (2) and/or a cover (7) of the coiler head (1) on its underside is advantageously made of special steel. <IMAGE>
