Abstract (en)

[origin: EP0670411A1] The roller blind box has a U-shaped cross-section and consists of brick material. The box is made of a one-piece hollow brick, whose length is a min. of 90cm. The length of the hollow brick may also be more than 1.6m in length. Arms (1,2) forming the U-profile and a cross rib (3) joining them have hollow chambers. At least the horizontally running walls (5) of the hollow chambers (4), including their horizontally running intermediate walls, have a pref. wall thickness of approximately 5-6mm. The vertically running side walls (6,6') of the hollow chambers have wall thicknesses partic. of approximately 5-6mm. The hollow chambers running longitudinally have a constant cross-section over their length.
